

**Oracle Approves JGI's Oracle Accelerate Solution Supporting the Professional Services Industry**

JGI Delivers Accelerated Oracle PeopleSoft Enterprise HCM & Financial Management Implementation Services for Professional Service Companies

**JGI – Rochelle Park, NJ, September 2, 2009** – JGI, a Certified Partner in the Oracle® PartnerNetwork, today announced its Oracle PeopleSoft Enterprise Human Capital Management (HCM) and Financial Management application implementation solution focused on supporting companies in the Professional Service industry. The JGI *Accelerated* implementation methodology provides a fixed-cost and fixed-scope approach to HCM and financial management applications for midsize organizations in the Professional Service industry, allowing these businesses to achieve real business value quickly. With its inclusion in the Oracle Accelerate program, JGI becomes the only North American service provider delivering an Oracle PeopleSoft Enterprise HCM and Financials Oracle Accelerate implementation solution for companies in the Professional Service vertical. Earlier in the year, JGI announced the acceptance of these solutions in the Oracle Accelerate program for the Financial, Media/Entertainment, and Healthcare industries.

The Oracle Accelerate program brings comprehensive, enterprise-class applications to midsize businesses. The key to Oracle Accelerate is the availability of application bundles that can be quickly implemented and that provide a wide range of functionality.

Recognizing that growing businesses with limited resources demand comprehensive business solutions that are low-cost and low-risk, JGI developed this approach, which combines industry best practices with customer-specific functionality and a faster time-to-value. Using a lab-based approach, JGI hosts the development environment on their servers where the majority of the project work is conducted. Later in the project, the environment can either be moved to the customers' data center or continue to be hosted.

"For over 27 years, JGI has provided services supporting our clients' systems implementation, integration and support needs," explained George DiGrandi, CEO of JGI. "We are proud that Oracle recognizes our approach, allowing midsize organizations to realize the benefits of an industry-leading solution at a fixed, affordable price."

"The professional service industry expertise provided by JGI is a key benefit for midsize businesses looking to benefit from specially-tailored Oracle PeopleSoft Human Capital Management or Financials solutions within this industry," said Mark Keever, Group Vice President, Oracle. "With the Oracle Accelerate program, we provide a selection of partner solutions that have passed our rigorous approval process, that deliver proven and affordable solutions that help midsize businesses overcome the industry complexities they face on a daily basis."

**About Oracle Accelerate**

Oracle Accelerate for midsize companies combines Oracle Applications and Business Accelerators with industry- and geography-specific deployment expertise to solve business problems in highly targeted and rapidly deployable packages. Oracle Business

Accelerators are rapid implementation tools, templates and industry- and geography-specific leading practice process flows provided by Oracle to partners to dramatically reduce implementation time, complexity, cost and risk.

### **About the Oracle PartnerNetwork**

Oracle PartnerNetwork is a global business network of more than 20,000 companies who deliver innovative software solutions based on Oracle software.
