

JGI Introduces TotalCare for PeopleSoft Customers

JGI – Rochelle Park, NJ, July 7, 2009 – JGI, an Oracle Certified Partner, today unveiled their latest PeopleSoft offering, TotalCare, developed to help organizations better manage their PeopleSoft applications. Recognizing the struggles that organizations are facing today with limited resources and reduced budgets, JGI developed the TotalCare solution to provide maintenance and dedicated support personnel in a secure, fully-redundant, scalable and monitored hosted environment. By leveraging their expertise in PeopleSoft, the JGI TotalCare solution acts as an extension of a customer's infrastructure, data center, and staff. The solution affords the customer the flexibility to customize the necessary components of their hosting and support requirements with JGI and establish a fixed and predictable monthly cost.

"The inspiration behind JGI TotalCare was to leverage our PeopleSoft resources and expertise in order to offer customers the ability to customize a flexible model that fits their unique business needs," explained Blane Cordes, VP-Oracle Practice. "The TotalCare solution allows customers to take advantage of their existing investments in hardware, software and personnel, and merge them with JGI resources to align the necessary components to efficiently manage and oversee their mission-critical PeopleSoft applications."

"JGI recognizes that in the current economic climate, companies need to be creative in the way they manage and staff their PeopleSoft support activities, so we have gotten creative as well," explained George DiGrandi, CEO of JGI. "TotalCare does not insist on a one-size-fits-all model, but rather offers a combination of hosting, maintenance, technical and functional support, tailored to meet clients' specific needs and budget. This design allows JGI to provide the close support of an internal infrastructure and staff, while also achieving the cost savings of traditional hosted offerings."

"If you are looking for ways to reduce your support budget, JGI TotalCare is the most flexible, comprehensive, and cost-effective solution on the market today," concluded Mr. DiGrandi.
