

JGI Launches Rapid Upgrade Solution for PeopleSoft HCM and Financial Applications

JGI S.A.F.E. Upgrade Solution was Developed to Provide a Rapid,
Cost-Effective Alternative to Traditional Upgrades

Rochelle Park, NJ – February 11, 2008 – JGI, a Professional Services firm specializing in Enterprise Applications and Business Intelligence Solutions, announced today the launch of their JGI S.A.F.E upgrade solution. This solution was designed to help customers maximize the return on their PeopleSoft investment.

The JGI S.A.F.E (Strategic, Accelerated, Flexible, Efficient) upgrade solution is a thorough upgrade methodology applicable to virtually any environment. This methodology was developed to provide PeopleSoft customers with a rapid, cost-effective alternative to the standard “cookie cutter” approach offered by other service providers. By utilizing the JGI S.A.F.E methodology, customers will reduce both the business and technical risks of an upgrade while realizing a faster return on their investments in the new release.

“Over the past 25 years, JGI has supported our customers’ applications and developed key relationships with the leading HCM and Financial Application vendors, and have managed hundreds of successful upgrades. The JGI S.A.F.E methodology is the culmination of this experience”, explained George DiGrandi, CEO of JGI. “And by offering our clients the option to perform these upgrades either at their site or remotely in our upgrade lab, we can ensure a successful upgrade with minimal disruption to their daily activities”.

About JGI

For over 25 years, JGI has been driving business value by helping enterprises implement, integrate and optimize their systems and processes offering services in Financial and HCM applications and Business Intelligence and Enterprise Reporting solutions. Additionally, JGI’s Business Consulting services provide best practice and benchmark analysis to optimize your organizations business performance. Our team of experienced consultants possess superior technical skills, vendor-specific expertise and deep business knowledge. We partner with the leading Enterprise Application vendors including Oracle, PeopleSoft, JD Edwards, Lawson, ADP and Business Objects.
